LinkedIn

PROFILE

Software engineer building web and mobile products, from user interfaces to the systems behind them. My work includes FlipMall, NerdSpace, practical business websites and developer tools. I work across product direction, implementation and iteration.

EXPERIENCE

Founder & CEO

Argus Platforms Limited

Lead product direction and software development for the company's digital products and public web presence. Work across requirements, interface design, web and mobile implementation, and supporting systems.

Company website

FEATURED PRODUCTS

FlipMall

MARKETPLACE / WEB & MOBILE

Designed and developed a marketplace connecting product discovery, seller storefronts and buyer/seller conversations. The product began with buying and selling needs in student communities.

Tools: React Native, Expo, React, Firebase

Explore project

NerdSpace

COMMUNITY / MOBILE & SUPPORTING WEB

Building a dedicated space for fandom conversations, community rooms, profiles and messaging, with moderation and account controls. Mobile store release preparation is ongoing.

Tools: React Native, Expo, Firebase

MORE PRODUCT WORK

Campus Buddy

MOBILE PROTOTYPE

University of Ghana campus discovery and opt-in walking companion app, with profiles, buddy requests and participant chat. Route previews are illustrated; device validation is ongoing.

Request a walkthrough

EasyPay

SANDBOX MVP

Merchant API and developer console for testing payment states, merchant isolation and idempotent requests. The current implementation simulates payments and does not move money.
